WebDT 390 Mobile Tablet Packs Powerful Point-of-Service in Rugged, Compact Package

***Optional MSR, Scanner, RFID, and Camera
Provide Application/ Location-Specific Service***

SAN JOSE, Calif., - March 1, 2010 - DT Research™, Inc., an industry leader in the development of information appliances for vertical markets, today announced the WebDT 390 Mobile Tablet, the newest addition to the WebDT family of tablet products. The WebDT 390 combines an 8.9-inch touch display with high performance processing. With a 1.6GHz Intel® processor, the WebDT 390 offers a range of options for point-of-service and point-of-sale applications in retail, healthcare, hospitality, gaming, entertainment, field service, and manufacturing.

The WebDT 390 offers a choice of operating systems, including Microsoft® Windows® and Windows Embedded, facilitating efficient integration with other applications and systems. Major integrated information capture options include a magnetic stripe reader for payment, loyalty program, and ID cards. The barcode and imaging scanner options can be used for managing inventory on the sales floor or in the warehouse, scanning entry tickets, or tracking packages. The 3-megapixel camera option streamlines insurance claims transmitting pictures directly to the claims office. These fully-integrated options offer added reliability and security over individual add-on components, and provide seamless data capture for faster processing and transmission. The optional 3G wireless WAN with GPS adds to the mobility with wireless networking and also enables transportation system applications and optional RFID improves inventory management applications.

The WebDT 390 is IP54-rated for water and dust resistance, lending itself to perform in demanding environments and endures real-life handling. Offering up to 4 hours of battery operation, the WebDT 390 also offers optional hot-swappable batteries for continuous operation, as well as optional battery charging accessories. Weighing just over 2 pounds, the WebDT 390 provides reliable information access and entry, going wherever needed for prompt service.

As with all WebDT products, the WebDT 390 can be remotely managed with the comprehensive WebDT Device Manager software. The WebDT 390 is available now, please contact DT Research or your WebDT reseller for more details and pricing.

About DT Research

DT Research™ develops and manufactures web-enabled information appliances for vertical applications. The WebDT family of products is based on thin computing platforms for secure, reliable, and cost-effective computing. WebDT products include digital signage solutions, wireless tablets, point-of-service handhelds, compact modular systems, and display-integrated information systems. These systems emphasize mobility, wireless connectivity and touch displays. Powered by Windows® Embedded and Windows XP operating systems, WebDT devices offer durability and ease in integration, leading to solutions that can be remotely managed with the comprehensive WebDT Device Manager software.
