For Immediate Release

WebDT Integrated LCD System with Antibacterial Protection

17-Inch and 22-Inch All-in-One Computing Displays for Healthcare Applications

SAN JOSE, Calif., - March 1, 2010 - DT Research™, Inc., an industry leader in the development of information appliances for vertical markets, today announced the WebDT 517MD and WebDT 522MD, the newest additions to the WebDT Integrated LCD System line. These UL60601-1 medical certified systems combine 17-inch and 22-inch displays respectively, with robust computing in one, slim, mountable design.

Ideal for germ-sensitive settings, the WebDT 517/ 522MD offers optional IR touch with an IP65 dustproof and waterproof rating, making it easier to clean and operate. Whether mounted on a cart, as a wall-unit, or at a nurses' station, the WebDT 517MD and 522MD support reliable point-of-care solutions, with optional wireless networking, and VESA mounting. An option with the WebDT 517MD for a magnetic stripe card reader (MSR) enables efficient check-in with a health plan card, or quick station sign-on with staff ID cards.

The WebDT 517/ 522MD's choice of Microsoft® operating systems, Windows® and Windows Embedded, provides a flexible platform for integrating with other applications and systems. The fanless, solid-state design adds to the reliability and lowers power consumption, while also providing quiet operation. The energy- and space-saving WebDT 517MD and 522MD bring flexible computing to the healthcare field for efficient data access and optimized workflow.

As with all WebDT products, the WebDT 517MD and 522MD can be remotely managed with the comprehensive WebDT Device Manager software. The WebDT 517MD and 522MD are available now. Please contact DT Research or your WebDT reseller for more details and pricing.

About DT Research

DT Research™ develops and manufactures web-enabled information appliances for vertical applications. The WebDT family of products is based on thin computing platforms for secure, reliable, and cost-effective computing. WebDT products include digital signage solutions, wireless tablets, point-of-service handhelds, compact modular systems, and display-integrated information systems. These systems emphasize mobility, wireless connectivity and touch displays. Powered by Windows® Embedded and Windows XP operating systems, WebDT devices offer durability and ease in integration, leading to solutions that can be remotely managed with the comprehensive WebDT Device Manager software.
