

DT311 Battery Charger Kit

BASIC OPERATION GUIDE

Thank you for purchasing the DT311 Battery Charger Kit by DT Research. This device enables charging of one DT Mobile Tablet (311) external battery pack. Please follow this guide for operational instructions.

Instructions:

The charger is designed to charge one DT311 battery. To connect the battery to the charger:

- Place the charger with LED-light facing up.
- Place the battery with top facing up (top is the side that is viewable when on the DT311 tablet).
- Align the battery pin connector facing the charger opening.

Please see images.

Slowly insert the battery into the charger, making sure the battery pin connector lines up with the charger pins. Push the battery all the way into the charger, the LED light on the charger should come on.

CAUTION: This charger must only be used with the specific battery models for which it is designed. Failure to do so may result in battery or charger damage, or personal injury.

Indicator Light:

The top of the Battery Charger features an LED light to indicate the battery charge status.

Light color	Status
Yellow	Charging
Green	Fully Charged

Package Contents:

1. DT311 Battery Charger
2. AC Power Adapter
3. AC Power Cord
4. Basic Operation Guide

CAUTION: Only use the AC Power Adapter that is provided with your charger. The power adapter, charger and the battery may become hot during the normal use. Allow for proper ventilation around the power adapter, charger and charging batteries. Never force a battery into the charger. Check for any obstructions before insertion.
