

DT Research ACCESSORY

Slim Detachable Keyboard

BASIC OPERATION GUIDE

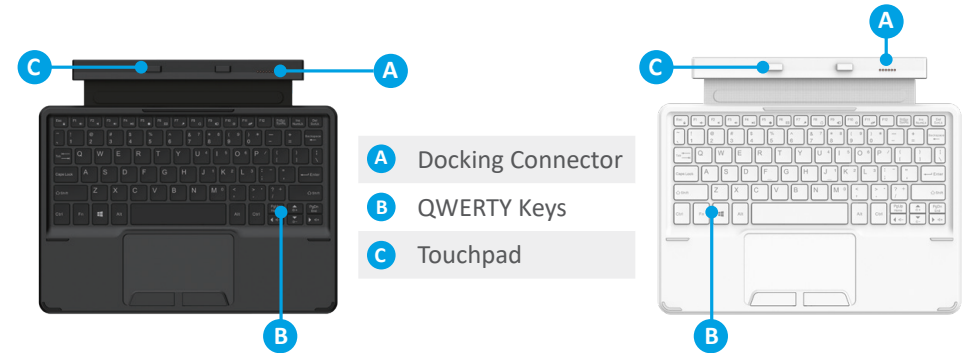

INTRODUCTION

Thank you for acquiring the detachable slim keyboard (ACC-KB01YS-01) designed for the DT301Y Rugged Tablet and 301Y/MD Medical Rugged Tablet. With this detachable keyboard, the tablet can easily transform from tablet to laptop and thus allows for working on the go in any desired scenarios. The magnetic hinge design eliminates the hassle for switching and pairing, making assembly an easy task. The keyboard itself also serves as a shielding cover when being attached and folded onto the tablet screen, adding an extra layer of protection to safeguard your important device.

PACKAGE CONTENTS

1. One slim detachable keyboard

The Detachable Keyboard

Using the Detachable Keyboard with the Tablet

- 1 Attach the slim detachable keyboard to the DT301Y or 301Y/MD tablet and make sure to align the port connectors. The Keyboard and Tablet will magnetically connect and automatically function together.

Note: Battery or external power supply is not required to use the Keyboard.

- 2 Fold the kickstand and keyboard toward the DT301Y or 301Y/MD tablet for portability and as a protective cover to shield the screen.
